Real Time Integration into Infor VISUAL Manufacturing
Inventory Accuracy All the Time
Super Quick Implementation Guarantee

Labor and Material Tracking

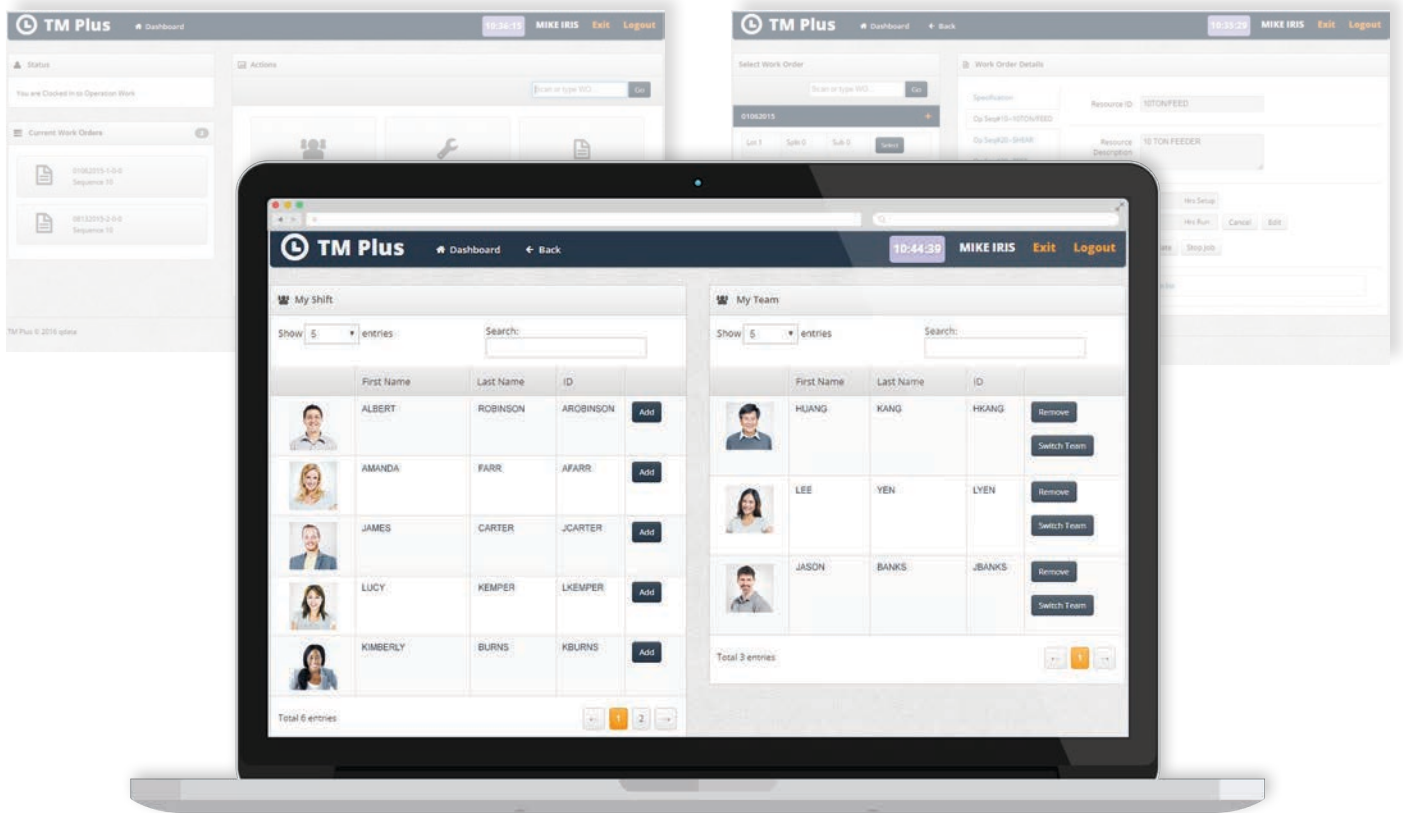

TM Plus™ is a real-time labor and material tracking software package that integrates with Infor VISUAL Manufacturing. Developed entirely using web-based technologies, it is compatible with Chrome, Explorer, and Safari. TM Plus™ is user-friendly with many added benefits designed to increase ROI and provide visibility. It has a simple and intuitive interface that saves valuable time. Your employees simply clock in and out of jobs; whether they're just getting started in the morning, taking a break, or leaving at the end of their shift.

Key Features:

- Capture time and materials to update your labor tickets
- Team leaders enter work group time & material usage
 - Create teams on the fly
 - Capture time by teams
 - Assign multiple jobs or Work Orders to a team
- Provide data on runtime, scrap, downtime, indirect jobs, and parts produced
- Track shift & break durations
- Team leaders enter work group time & material usage
- Multi-shift support
- Multi WO support with time division
- Threshold set-up for auto log-out
- Report on indirect jobs, forced closed tickets, overruns, and completed jobs
- Real time validation of work orders and part numbers
- Auto issue trigger of raw materials
- Receive finished goods
- Web based interface supports a wide range of hardware platforms including Windows, iOS, & Android.
- Output labor time to your preferred payroll provider

TM Plus™ is the fastest and most hassle-free way to enter, track, and manage labor transactions.

TM Plus™ incorporates a variety of software, hardware, and professional services to deliver a single comprehensive solution. Some benefits include:

- Eliminate paper based labor and material tracking tickets
- Reduced errors via real-time validation
- Real-time visibility of work order status
- Enhanced shop floor visibility
- Improved inventory accuracy
- Enhanced accountability

Portable Intelligence has been working with supply chain and inventory management for more than 20 years, and is used by best in class manufacturers all over North America. Combined with our ERP integration expertise, we can provide best of breed data collection solutions that will not only reduce your supply chain issues, but also promote growth and profitability within your business.

TM Plus™ is compatible with:
